DAY 71 · AI_WITH_MUDIT

Fable 5.1 use cases.

Maine iske saath kya kya nikala, aur main isko kaise use karne wala hoon. Zyada important, kab isko use nahi karna chahiye.

> Ye guide ek cheez ke baare mein hai: **paisa aur decision**. Fable 5.1 sabse capable widely released model hai. Wo bhi sach hai ki sabse mehnga hai. Isliye aadha guide "kaise chalao" nahi, "kab chalao" hai.

By @ai_with_mudit

Verified September 2026 · Source: Anthropic model and pricing docs · Prices change, dobara check kar lena.

Is guide mein kya hai

Das section. Page 5 sabse kaam ka hai, wahan screenshot lena.

01 **Ek line mein** Ye model kis cheez ke liye hai

02 **Numbers, verified** Price, context, limits

03 **Paisa, seedhi baat** Ek kaam har model par kitne ka

04 **Kab Fable 5.1, kab nahi** Screenshot wala page

05 **Use cases jo maine nikale** Paanch, wajah ke saath

06 **Jo cheezein surprise karengi** Errors jo maine khaye

07 **Setup, sabse sasta rasta** Code jo chalta hai

08 **Aaj ka kaam** Ek ghanta, ek dollar se kam

09 **Wo $20 wala experiment** Reel ka poora setup

10 **Kya na karo** Paanch galtiyan

> **PADHNE KA TAREEKA**
>
> Agar time kam hai to sirf page 5 aur page 6 padho. Wo do page mein guide ka 80% paisa bachane wala hissa hai. Baaki tab padhna jab actually code likhne baitho.

SECTION 01

Ek line mein

Fable 5.1 wo model hai jise tum tab bulate ho jab **kaam lamba hai, context bada hai, aur galti mehngi hai**. Baaki har cheez ke liye sasta model behtar hai.

> **SABSE ZAROORI LINE**
>
> Sabse achha model hamesha sabse sahi model nahi hota. Fable 5.1 ka input Sonnet 5 se 5 guna mehnga hai. Agar Sonnet 5 se kaam ho raha hai, to Fable 5.1 chalana paisa jalana hai.

Aur ye sirf meri opinion nahi hai. Anthropic ke apne docs mein likha hai ki zyadatar workload ke liye Opus 5 se shuru karo, aur Fable 5.1 tab uthao jab demanding reasoning ya long horizon agentic kaam ho, ya jab Opus 5 higher effort par bhi kam pad raha ho.

Ek cheez clear kar doon

Fable 5.1 aur Mythos 5.1 andar se ek hi model hain. Farak sirf safeguards ka hai. Fable 5.1 sabke liye khula hai. Mythos 5.1 sirf Project Glasswing ke approved logon ke liye hai. Tum jo use karoge wo Fable 5.1 hai, aur usme koi access approval nahi chahiye.

SECTION 02

Numbers, verified

Ye sab Anthropic ke apne docs se hain, September 2026 mein check kiye gaye.

CHEEZ	VALUE
Model ID	`claude-fable-5-1`
Context window	1,000,000 tokens
Max output	128,000 tokens
Input price	$10.00 per 1M tokens
Output price	$50.00 per 1M tokens
Cache read price	$0.25 per 1M tokens
Cache write (5 min)	$12.50 per 1M tokens
Cache write (1 hour)	$20.00 per 1M tokens
Thinking	Hamesha ON. Tum band nahi kar sakte.
Effort levels	`low / medium / high / xhigh / max` (default: high)

WO HIGHLIGHT KIYA HUA ROW

Cache se padha gaya token fresh input se **40 guna sasta** hai. Baaki Claude models par cache read normal input ka 10% hota hai. Fable 5.1 par sirf 2.5% hai. Agar tum baar baar wahi bada context bhej rahe ho, caching lagana optional nahi hai.

PAR CACHE FREE NAHI HAI

Pehli baar cache likhne ka kharcha normal input se zyada hai. 5 minute ke cache ke liye $12.50 per 1M, aur 1 ghante ke liye $20 per 1M. Matlab pehla call mehnga padta hai, faayda doosre call se shuru hota hai.

Seedha matlab: agar tum wahi context **sirf ek baar** bhej rahe ho, cache mat lagao. Wo ulta mehnga hai. Cache tab lagao jab wahi context teen ya usse zyada baar jaana hai.

SECTION 03

Paisa, seedhi baat

Ek normal kaam socho. 10,000 tokens andar, 2,000 tokens bahar. Roughly ek lambi PDF padhwa ke ek page ka jawab lena.

MODEL	EK KAAM	$20 MEIN KITNE KAAM
Fable 5.1	$0.20	~100
Opus 5	$0.10	~200
Sonnet 5	$0.04	~500
Haiku 4.5	$0.02	~1000

Base rates: Fable 5.1 $10/$50, Opus 5 $5/$25, Sonnet 5 $2/$10, Haiku 4.5 $1/$5 per 1M input/output tokens.

YE WALA MAT BHOOLNA

Poora 1M context ek baar bharne ka matlab hai **$10 ka ek call**. Do call, aur $20 khatam. Bada context ek feature hai, muft nahi hai.

Isiliye maine reel wale experiment mein $20 hi diya. Wo ek asli budget hai jo do galat calls mein khatam ho sakta hai. Us pressure ke bina experiment ka koi matlab nahi tha.

EK AUR CHEEZ JO BILL PAR DIKHTI HAI

Thinking hamesha on hai, aur thinking ke tokens bhi output tokens hain. Matlab tumhara asli output bill upar wali table se thoda zyada aayega, khaas kar jab effort xhigh ya max par ho. Effort kam rakhna sirf speed nahi, paisa bhi bachata hai.

SECTION 04

Kab Fable 5.1, kab nahi

Ye guide ka sabse kaam ka page hai. Isko screenshot le lo.

KAAM	KYA CHALAO
Chat, sawaal jawaab, chhota summary	**Sonnet 5**
Text classify karna, tag lagana, saaf karna	**Haiku 4.5**
Caption, email, post likhwana	**Sonnet 5**
Normal coding, ek file ka bug	**Opus 5**
Bulk mein 10,000 rows process karna	**Haiku 4.5**
Poora repo ya poori book ek saath padhwana	**Fable 5.1**
40 step ka kaam, ek hi baar mein	**Fable 5.1**
Jahan galti ka nuksaan poora din khaa jaye	**Fable 5.1**

TEST

Pehle sasta model chalao. Agar output kaam ka hai, wahin ruk jao. Fable 5.1 tab hi uthao jab sasta model fail ho, na ki isliye ki naam bada hai.

ISE ULTA BHI SOCHO

Sawaal ye nahi hai ki "kaunsa model sabse achha hai". Sawaal ye hai ki "ek complete kaam kitne ka pada". Usme retry, dobara bheja gaya context aur tool calls sab shaamil hain. Kabhi kabhi mehnga model isliye sasta padta hai kyunki wo pehli baar mein sahi kar deta hai. Aur aksar nahi bhi padta. Isiliye measure karna zaroori hai, maan lena nahi.

SECTION 05

Use cases jo maine nikale

Paanch. Har ek ke saath wajah, taaki tum blindly copy na karo.

1. Poora context ek baar mein

1M tokens ka matlab hai poora codebase, poori PDF library, ya ek saal ke notes, ek hi prompt mein. Chunking ka jhanjhat khatam, aur wo galtiyan bhi khatam jo chunk ke beech mein cheez kho jaane se hoti hain.

KYUN FABLE: bada context isi ka kaam hai. Par yaad rakho, ek bhara hua call = $10.

2. Lamba agentic kaam

Ye model long horizon kaam ke liye bana hai. Ek mushkil request kai minute tak chal sakti hai, aur wo bug nahi hai, wo design hai. Apne timeout aur apne UI ko us hisaab se set karo.

KYUN FABLE: yahi wo kaam hai jiske liye ye banaya gaya hai.

3. Wo kaam jahan galti mehngi hai

Ek migration jo tootne par poora din khaata hai. Ek lamba document jisme ek line miss karne se matlab badal jaata hai. Yahan $0.16 extra kharch karna sasta hai.

KYUN FABLE: cost of error, cost of tokens se bada hai.

4. Research jo tumhein khud verify karna hai

Thinking ka summary on karo. Tumhein raw chain of thought kabhi nahi milega, kisi bhi model par nahi, par summary se ye dikh jaata hai ki usne kis raste se jawaab banaya. Jab tum output par bharosa karke aage kuch banane wale ho, ye kaafi kaam ka hai.

KAISE: `thinking = {"type": "adaptive", "display": "summarized"}`

5. Ek chhota experiment, asli paise ke saath

Model ko ek budget do, ek deadline do, aur ek saaf kaam do. Reel wala $20 experiment isi shape ka hai. Ye seekhne ka sabse tez tarika hai, kyunki budget khatam hone par feedback turant milta hai.

KYUN FABLE: lamba, khula kaam. Par budget pehle set karo, baad mein nahi.

SECTION 06

Jo cheezein surprise karengi

Ye sab maine error dekh ke seekha. Tumhe nahi dekhna padega.

TUM YE KAROGE	YE HOGA
`thinking: {"type": "disabled"}`	400 error. Parameter bhejo hi mat.
`budget_tokens`	400 error. `output_config.effort` use karo.
`tool_choice: {"type": "any"}`	400 error. `auto` use karo, aur prompt mein tool ka naam likh do.
Assistant prefill	400 error. Structured outputs ya system prompt use karo.
`temperature, top_p, top_k`	Default hi chalega. temperature 1.0, top_p 0.99. Dono saath mein nahi. top_k bilkul nahi.
Zero data retention account	400 invalid_request_error. 30 din ka retention chahiye, jab tak Anthropic khud authorize na kare.

SABSE ULTA WALA

Purane models ke liye likhe gaye lambe, bahut detailed prompts yahan ulta kaam karte hain. Zyada micro instructions dene se output kharab hota hai. Prompt chhota karo, kaam saaf likho, aur model ko rasta khud chunne do. Ye ulta lagta hai, par yahi sach hai.

Ek aur cheez: refusal

Kabhi kabhi model mana kar deta hai. Wo error nahi aata, HTTP 200 hi aata hai, bas `stop_reason` "refusal" ho jaata hai. Content padhne se pehle hamesha stop_reason check karo, warna tumhara code khali string aage bhej dega aur tumhe pata bhi nahi chalega.

ISKO SERIOUSLY LENA

Is model par refusal rate purane Claude models se saaf taur par zyada hai. Matlab refusal ko exception mat maano, use ek normal response path maano aur uske liye code likho. Achhi baat ye hai ki jo request shuru hone se pehle hi block ho jaati hai, uska paisa nahi katta. Jo beech mein block hoti hai, uske ab tak bane tokens ka paisa katta hai.

SECTION 07

Setup, sabse sasta rasta

```python
# pip install anthropic
from anthropic import Anthropic

client = Anthropic()   # ANTHROPIC_API_KEY, ya `ant auth login`

resp = client.messages.create(
    model="claude-fable-5-1",
    max_tokens=16000,
    output_config={"effort": "high"},
    # thinking parameter bhejna hi nahi hai
    messages=[{"role": "user", "content": "Tumhara kaam yahan."}],
)

if resp.stop_reason == "refusal":
    print("Model ne mana kiya:", resp.stop_details)
else:
    print("".join(b.text for b in resp.content if b.type == "text"))
```

> **DHYAN DO**
>
> `resp.content[0]` mat likhna. Thinking on hone ki wajah se pehla block thinking ka ho sakta hai, text ka nahi. Isliye upar filter lagaya hai.

Lamba output chahiye to stream karo

```python
with client.messages.stream(
    model="claude-fable-5-1",
    max_tokens=64000,
    output_config={"effort": "xhigh"},
    messages=[{"role": "user", "content": "..."}],
) as stream:
    resp = stream.get_final_message()
```

Bada context bhej rahe ho? Cache lagao

```
resp = client.messages.create(
    model="claude-fable-5-1",
    max_tokens=16000,
    system=[{
        "type": "text",
        "text": BADA_CONTEXT,
        "cache_control": {"type": "ephemeral"},
    }],
    messages=[{"role": "user", "content": "Sawaal 1"}],
)

# Check karo ki cache lag bhi raha hai ya nahi
print(resp.usage.cache_read_input_tokens)
```

Agar wo number har baar zero aa raha hai, matlab cache lag hi nahi raha. Aksar wajah ye hoti hai ki context ke shuru mein koi badalti hui cheez hai, jaise timestamp ya koi ID. Stable cheez pehle rakho, badalti hui cheez baad mein.

SECTION 08

Aaj ka kaam

Ye ek ghante ka kaam hai aur iska kharcha ek dollar se kam hai. Aaj hi ho jaayega.

1. **Ek kaam chuno jo tum har hafte haath se karte ho**
2. **Usko ek saaf prompt mein likho**

   Chhota rakho. Yaad rakho, is model par lamba prompt ulta kaam karta hai.
3. **Pehle Sonnet 5 par chalao**

   Cost note karo.
4. **Ab wahi prompt Fable 5.1 par chalao, effort high**

   Cost note karo.
5. **Dono output ko saath rakh ke dekho**
6. **Faisla likho**

   Kya farak 5 guna paise layak tha?

DONE STATE

Tumhare paas ek chhoti table hogi: kaam, dono cost, aur ek faisla. Bas yahi cheez hai jo zyadatar log kabhi nahi banate, aur isi wajah se wo har kaam ke liye sabse mehnga model chalate rehte hain.

SECTION 09

Wo $20 wala experiment

Reel mein jo maine kiya, poora setup yahi tha, taaki tum bhi wahi dobara kar sako.

CHEEZ	SETUP
Budget	$20, isse zyada ek rupaya nahi
Time	7 din
Kaam	Real duniya mein jitna ho sake utna paisa banao
Compare kiya	Fiverr, Upwork, thrift selling
Chuna	Google Business Profile Optimization

STATUS, IMANDARI SE

Experiment abhi chal raha hai. Maine abhi tak koi kamai nahi dikhayi kyunki abhi hui nahi hai. Result Day 78 par aayega, chahe wo accha ho ya bura.

EK BAAT SAAF KAR DOON

Ye ek experiment hai, income proof nahi hai. Agar koi tumhe kisi AI model se guaranteed kamai bech raha hai, wo jhooth bol raha hai.

Yahan sirf ek cheez test ho rahi hai: model apne aap ek asli kaam chun ke us par kaam kar sakta hai ya nahi.

SECTION 10

Kya na karo

Har kaam ke liye sabse bada model mat chalao

Ye guide isi liye bana hai.

Bada context bina cache ke baar baar mat bhejo

Aur ulta bhi: ek hi baar ke context par cache mat lagao, wo mehnga padta hai.

Bina budget set kiye agent ko khula mat chhodo

Lamba agentic kaam design hai, par bill bhi lamba ho sakta hai.

Purane model wale lambe prompts copy mat karo

Yahan wo output kharab karte hain.

Pricing yaad mat rakho

Ye badalti rehti hai. Use karne se pehle check karo.

Aur ek aakhri baat

Is guide ka har number aaj sach hai. Do mahine baad shayad na ho. Isliye guide ka asli kaam number yaad karana nahi hai, wo tareeka sikhana hai: sasta model pehle, measure karo, phir faisla lo. Wo tareeka tab bhi chalega jab saare naam aur prices badal jaayenge.

Sabse achha model hamesha sabse sahi model nahi hota.

Sasta model pehle chalao. Measure karo. Phir faisla lo. Bas itna hi.

@ai_with_mudit

Roz ek verified AI cheez. Chaos maine already khaa liya hai.

Ye guide free hai aur free rahegi. Kisi ko bhejna ho to bhej do.

Numbers Anthropic ke apne model aur pricing docs se liye gaye hain, September 2026 mein check kiye gaye. Pricing badalti rehti hai. Kuch bada banane se pehle khud verify kar lena.
