AN @AI_WITH_MUDIT EXPERIMENT · BUILT WITH CLAUDE

PROMPT WARS
Welcome to Promptnagar

A tiny cartoon town where you learn to prompt AI by actually doing it. You write the prompt, a real AI does the work, a second AI judges it, and a coach shows you how to make it better. **This is the early access guide.**

12 clients | Real AI inside | 9 prompt cards | A whole living town

What this actually is

Most "learn prompting" content is someone talking at you. Promptnagar is the opposite: it is a game you play with a real AI living inside it. Townspeople walk up with real jobs and strict rules. **You do not write the post. You write the prompt.** The AI only ever sees what you typed, never the brief, so saying the right thing the right way is the entire skill. Then a second AI grades your work in character, you get paid based on how good your prompt was, and a coach tells you the one thing to fix. That loop is how you actually get better.

WHY IT NEEDS YOUR OWN AI KEY

This game runs on a real AI brain, and that brain is free. You bring your own Google Gemini key, which takes about 60 seconds to create and needs no credit card. Getting that key is genuinely the first skill the game teaches you. Your key is saved only on your own device and is sent only to Google, never to us. There is no server. Page 2 walks you through it.

EARLY ACCESS, AND PROUD OF IT. The core, learning to prompt through real practice with real feedback, is fully here today. The walking avatar, the talking townsfolk, the cheering crowd: also here. More fun and more interactivity is coming, and if you grab it now you will be the first to get every update.

The 60-second start

1. OPEN Tap the play link on your phone

,Üí

2. GET KEY Free Gemini key, no card

,Üí

3. PASTE Drop it in, test it

,Üí

4. PLAY Your first client is waiting

The first two clients run in a free demo mode with no key at all, so you can taste the game first. The real AI switches on the moment you add your key.

PLAYER SETUP

Get your free AI key

1. **Open Google AI Studio.** Go to `aistudio.google.com/apikey` in any browser and sign in with any Google account. This is Google's official, free home for Gemini keys.

2. **Tap "Create API key."** Accept the terms if asked. No credit card, no payment, nothing to install. The free tier is more than enough for this whole game.

3. **Copy the key.** It is a long string of letters and numbers. Copy the entire thing.

4. **Paste it into the game** and tap TEST AND ENTER THE TOWN. If it greets you, you are in. If it complains, you probably copied only part of the key, try again.

IS MY KEY SAFE?

Yes. The key lives only in your phone's browser storage and is sent only to Google when the game asks the AI to do something. Nothing is uploaded to any server of ours, because we do not run one. You can open the game file in any text editor and read every line yourself.

HIT A "FREE TIER IS BUSY" MESSAGE? That is just Google's free limit catching its breath. Wait about 30 seconds and run it again. It is not an error with the game or your key.

HOW TO PLAY

The loop

EVERY CLIENT

- A villager waits in the plaza with a "!" Walk up and read their brief and their hard rules.
- Write the **prompt**, not the answer. Restate the rules inside it. The AI never saw the brief.
- Run it. Watch the AI write live. The constraints get checked and a second AI scores your work.
- Scored low? Tap **COACH ME** for the one fix, then rewrite. Happy? Take the money.

THE TOWN

- Every client you nail builds their shop and the crowd runs over to cheer you.
- **Tap any villager** to talk to them. They remember the work you have done.
- Two boss fights: talk a guard AI into leaking a secret code. Pure prompting.
- Finish all 12 and the town builds a statue of you. Save your flex card and challenge a friend.

THE 9 PROMPT CARDS ARE THE REAL TAKEAWAY

Each client you beat unlocks a real, reusable prompt template, the Spotlight, the Fact Gate, the Style Clone, and more. Every card has a COPY button. These work in ChatGPT, Claude, or Gemini in your real life, long after the game. That is the actual gift here.
